protecting your computer

When accessing Dnister's Digital Banking, you must take responsibility for maintaining the confidentiality and integrity of your available security. To do this, Dnister recommends that you have installed:

Anti Virus Software - This scans your computer's files and incoming emails for viruses. As virus technology is constantly changing, it is important to regularly run and update this software to ensure your computer is not infected.

Firewall Software - This provides a level of protection for a computer connected to the Internet against hacker intrusion by monitoring access into and out of the system.

declaration

I acknowledge that I have an increased risk of loss associated with higher limits and will maintain strict security of my member number and access codes at all times.

I am aware that I have an increased risk of loss associated if accessing Digital Banking which does not have the recommended security software.

I understand Dnister reserves the right to decrease limits at any time without notice.

Please forward the **completed and signed application to Dnister** by mail or via the fax number listed.
